

Assignment -4

| | |
|---------------------|-----------------|
| Assignment Date | 07 October 2022 |
| Student Name | D.Priyadharshan |
| Student Roll Number | 311519205050 |
| Maximum Marks | 2 Marks |

Question 1:

1. Pull an Image from docker hub and run it in docker playground

The screenshot shows the Docker Playground interface. On the left, there's a sidebar with a clock showing 03:49:53, a 'CLOSE SESSION' button, and a list of instances. The main area displays the session name 'cdbtcu0_cdbtcui3tccg009sea60', the IP address '192.168.0.28', and an 'OPEN PORT' button. Below this, there's a 'Memory' and 'CPU' section, and an 'SSH' section with a terminal window. The terminal shows the command 'docker pull uifd/ui-for-docker' being executed, pulling the latest image from Docker Hub. The output shows the image being pulled and the digest 'sha256:fe371ff5a69549269b24073a5ab1244dd4c0b834cbadf244870572150b1cb749'.

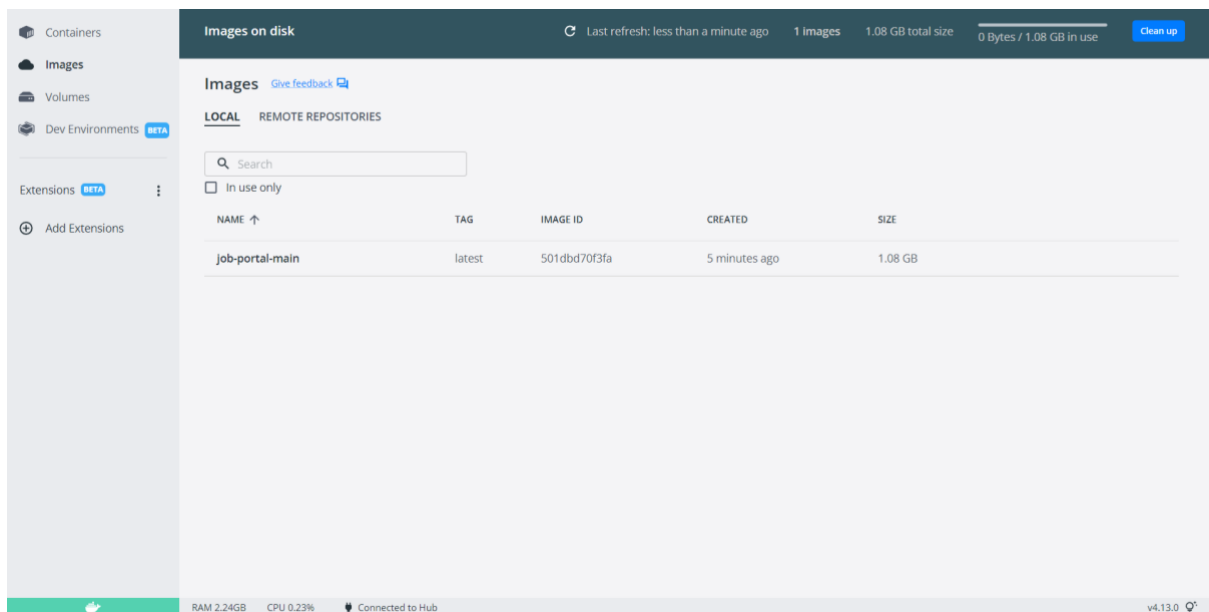

Question 2:

2. Create a docker file for the jobportal application and deploy it in Docker desktop application.

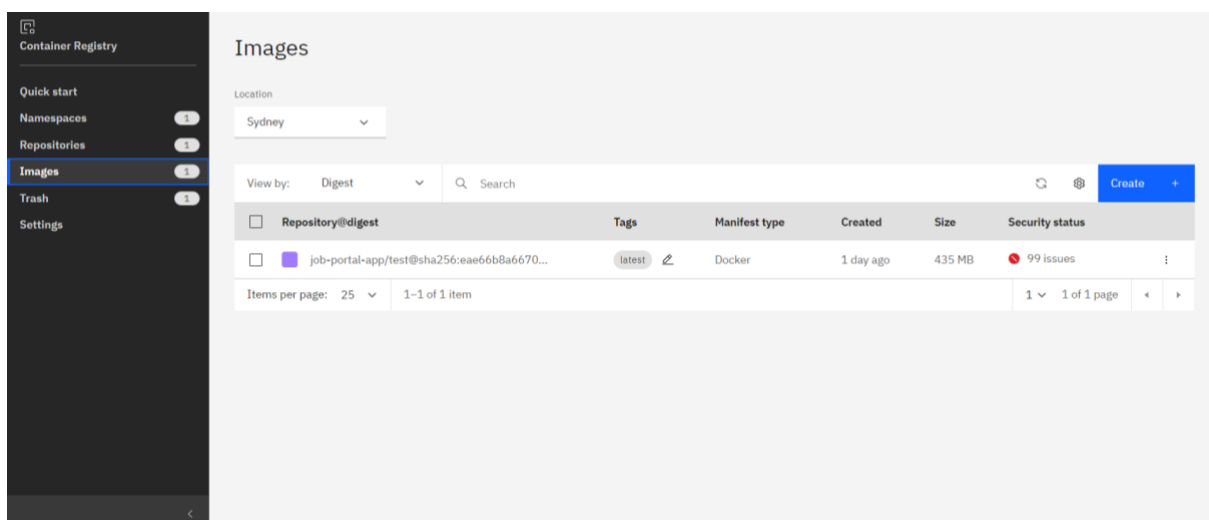

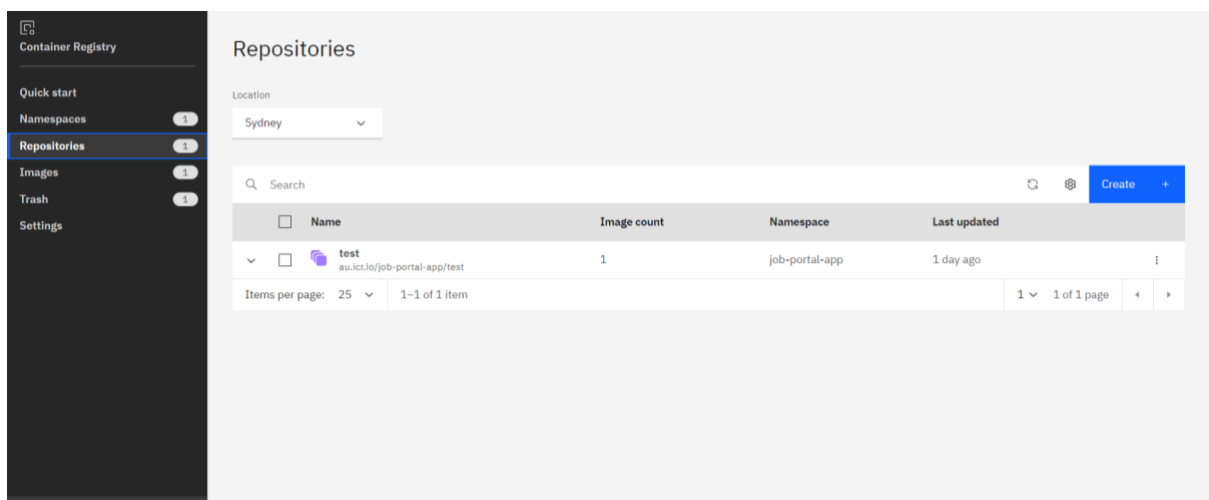

The screenshot shows the Visual Studio Code editor with a Dockerfile open. The Dockerfile contains the following instructions:

```
1 FROM python:3.6
2 WORKDIR /app
3 ADD . /app
4 COPY requirements.txt /app
5 RUN python3 -m pip install -r requirements.txt
6 RUN python3 -m pip install ibm_db
7 EXPOSE 5000
8 CMD ["python", "app.py"]
```

Question 3:

3. Create a IBM container registry and deploy helloworld app or jobportalapp.

```
Command Prompt - docker run -p 5000:5000 au.icr.io/job-portal-app/test
C:\Users\user>docker push job-portal-main au.icr.io/job-portal-app/test
'docker push' requires exactly 1 argument.
See 'docker push --help'.

Usage:  docker push [OPTIONS] NAME[:TAG]

Push an image or a repository to a registry

C:\Users\user>docker tag job-portal-main au.icr.io/job-portal-app/test
C:\Users\user>docker push au.icr.io/job-portal-app/test
Using default tag: latest
The push refers to repository [au.icr.io/job-portal-app/test]
90f7c020340: Mounted from job-portal-app/testrepo
3eb3ce3cfa8b: Mounted from job-portal-app/testrepo

Aboutus

Mission

SMARTBRIDGE is an edTech organization with a vision to bridge the gap between academia & industry. Our outcome-based experiential learning programs on emerging technologies (Internet of Things, Machine Learning, Data Science, Artificial Intelligence, Robotics) are building skilled entry - level engineers, for the corporate world. .

Vission

Our main objective is to bridge the existing gaps between prevailing industry standards and what the academics offer to the graduates while passing out of university. SmartBridge offers suitable skill deployment and training to the young talent before on boarding their first job. Our skill development programs are designed considering the present expectations in the industry.

Objective

Well directed career guidance programs for educational institutions
Appropriate certification courses that suit the industry need
Train the trainers; expanded awareness about the current industry standards
Liaise with corporates to offer niche internships
Establish technology development centers in colleges
Specialised incubation centers in collaboration with corporates
